GOLDEN FORESTS

Agroforestry Intelligence

DIVERSIFIED AGROFORESTRY RETURNS: 14-23%

Direct ownership of premium Philippine mango and *Aquilaria crassna* agarwood trees GPS verification | Professional management | Measurable impact

INVESTMENT OPPORTUNITIES

Example Portfolio Configuration

SWEET ELENA CARABAO MANGO

50 trees: USD 29,625

- Years 5-25 production
- **14-23%+** annualised returns
- Annual cash flows

AQUILARIA CRASSNA AGARWOOD

100 trees: USD 29,250

- Years 9-10 harvest
- **18%** annualised returns
- Concentrated returns

WHY COMBINE BOTH?

- **Timeline Diversification:** Annual mango income + concentrated agarwood returns
- **Market Risk Mitigation:** Two distinct commodity markets (luxury fragrance vs premium agriculture)
- **Enhanced Returns:** 2.5% additional combined portfolio discount
- **Single Management:** One platform, unified reporting, long-term client relationships

How It Works

Direct Ownership: Each tree is individually GPS-verified and digitally certificated in your name
Professional Management: Full lifecycle care from planting through harvest and sales
Complete Transparency: AI-enabled monitoring, annual audits, real-time reporting
Harvest Proceeds: Distributed by 31 December each harvest year

COMBINED PORTFOLIO PRICING

Illustrative Pricing (150-tree portfolio)

Standard Pricing (150 trees)	USD 58,875
With 2.5% Combined Discount	USD 57,403
Your Savings	USD 1,472

Plus volume discounts available for larger portfolios

ABOUT GOLDEN FORESTS

Golden Forests is an alternative investment company offering private and professional investors direct ownership of premium agarwood and mango trees on professionally managed plantations in the Philippines. Our commission-based model aligns our incentives directly with client outcomes, we earn only when your trees produce.
